

FasTec Adds Two New Pultrusion Machines

FasTec has Added More Capacity (AGAIN!) to the Mexico Facility.

FRP Shapes in Houston

FasTec is now stocking FRP Shapes at our Houston Warehouse Facility. FRP Angle, Channel, Tube, Flat Strip, Decking, Flat Sheet, Rod and Ladder Components to Compliment our Large Supply of Grating Products. Call us for Immediate Shipment!

AutoCAD/SolidWorks

FasTec utilizes current editions of both AutoCAD and SolidWorks in-house to Design and Build FRP Profiles of all Sizes and Shapes. Custom Profiles and Standard/Traditional. Fiberglass can Solve Problems that Traditional Materials Cannot Fix. Let us help you Design It in Fiberglass and Solve Problems!

FasTec Designs and Builds Custom FRP Lattice & Railing for Beach Resort

New FasTec Project Sheds Light in Hotel

FasTec Designed & Fabricated this FRP Railing System and Lattice Structure for a Premier Beach Resort in Cabo San Lucas, Mexico. The owners needed a Long-Term Solution with a Modern, Decorative Look. Located directly on the Beachfront... Exposure to Salt Air, Storms and Direct Sunlight made Fiberglass the Best Solution! No Rust means Long-Term Strength and Sustainability. The Lattice design allows the Light to Transition into the Hotel - Filling the Lobby with Natural Light. FasTec modeled this concept in SolidWorks so the Customer could Visualize the end Product. Both the Lattice and Railing was Pre-Fabricated at the Factory in Sections, then shipped to the Job Site - ready for Quick Installation.

FasTec Manufactures Door Frames in Several Colors and Sizes
