

FasTec Continues to Provide Custom Outdoor Structures to Coastal Resorts

This Fiesta Americana Hotel in Puerto Vallarta Mexico has a New outdoor Dining Area overlooking the Pacific, that will Not Rust or Degrade in the Salt Air. Commercial Properties along the coast are exposed to High use and Traffic, Extreme Weather Conditions and Strong UV. FRP can be an excellent solution to traditional materials that will not hold up to these harsh conditions.

NEW FRP Corner Roll Shape

6 X 6 X .090" Angle is a New Profile @ Fastec. This profile was designed to be used as a Corner Roll for Casing on FRP Cooling Towers. Available in virtually any Length gives Flexibility for Installation. It is Stocked in 8' Sections in Houston. Call for Pricing!

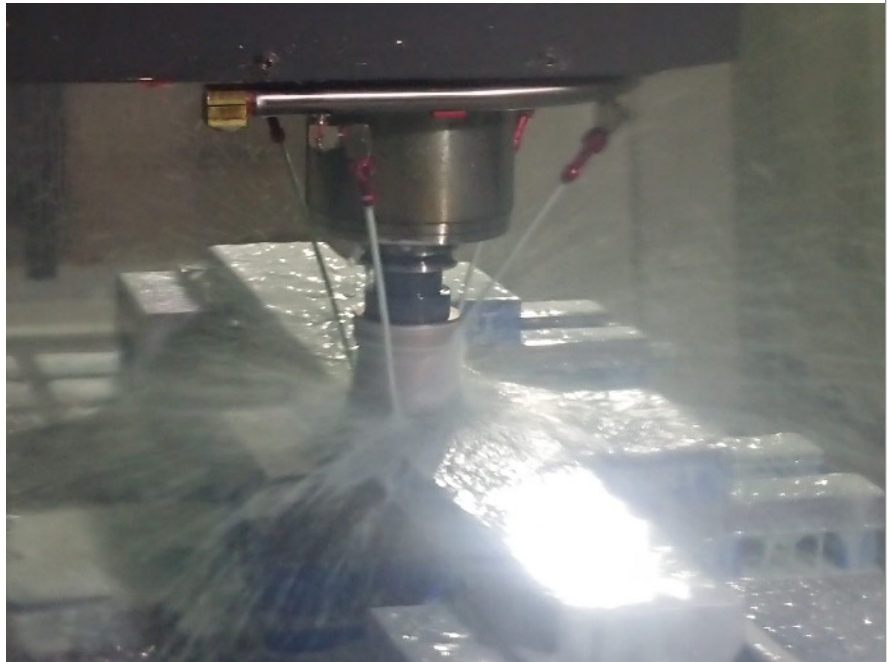

FRP Tooling & Dies

FasTec Designs & Builds our own Pultrusion Dies, Tooling, Equipment and In-Feed Systems. Recently, we developed a New System for Fixed Mandrel Tubes and we have moved this New Technology Across our Product Line to Manufacture better, more Accurate Profiles. We use State-of-the-Art Computer Controlled Cutting, Grinding and Polishing Equipment to Manufacture Pultrusion Equipment and Dies in our Mexico Facility. You will find our Pricing for Custom Dies and Profiles to be much more competitive vs. the Competition!

We understand that the cost to switch over a traditional profile to FRP can be expensive and FasTec believes in working with our customers to develop New and Better Products. Let FasTec make it Affordable for a Long-Term Solution and Partnership.
