

## **FRP is an Engineered Product**

FRP is an Engineered Product and therefore varies from Manufacturer. Each has their own "Recipe" and uses different Raw Materials, Combinations of Raw Materials and Placement, Additives, Production Variations, Line Speeds, Quality Standards and QC Practices. There can be significant variation between manufacturers and their practices, which leads to Quality vs. Poor Quality.

## **Molded Grating Quality**

The Photos to the Right represent Quality Molded Grating vs. Poor Quality Molded Grating. The Aesthetics Differences are Very Apparent, however the Mechanical Strength Differences are Significantly Important. Testing Proves the Differences... Nearly 40% Strength Variation between these two (2) identical size panels of grating!
